

Agile Patency Capsule Price Quote

About the Agile Patency Capsule

The Agile Patency Capsule system was designed to help physicians identify which patients with known strictures or previous colon obstructions may safely undergo a capsule endoscopy. The patient ingests the dissolvable capsule and is scanned after 30 hours to determine if the capsule was excreted. If the capsule is not detected after 30 hours, the patient is able to undergo a capsule endoscopy.

Billing

Listed below are the specific billing code and fee for the Agile Patency Capsule. Although this procedure has been approved by the FDA, it is still considered investigative by some insurance companies and therefore may not be covered. The actual allowed amount (the amount of the billed charge deemed payable by an insurance plan) for each charge and the amount of your out-of-pocket expenses will depend on your particular insurance plan. It is important to check your individual policy and direct any questions to your insurer to determine coverage and your financial responsibility prior to receiving treatment.
