

FibroScan Price Quote

About the FibroScan

FibroScan is an FDA-cleared non-invasive diagnostic test for liver stiffness assessment using a novel technology called Vibration Controlled Transient Elastography (VCTE). The technique involves establishing a mechanical shear wave in liver tissue and determining the speed of shear wave propagation, which is equivalent to stiffness. Liver stiffness is a key physiologic parameter correlated to degree of fibrosis, or scarring.

Billing

Listed below are the specific billing code and fee for the FibroScan. The actual allowed amount (the amount of the billed charge deemed payable by an insurance plan) for each charge and the amount of your out-of-pocket expenses will depend on your particular insurance plan. It is important to check your individual policy and direct any questions to your insurer to determine coverage and your financial responsibility prior to receiving treatment.
