

SmartPill GI Monitoring System Price Quote

About SmartPill

The SmartPill Monitoring System consists of a small disposable and ingestible capsule which measures pH, pressure and temperature within the entire gastrointestinal tract. The capsule wirelessly transmits the collected data to a receiver that is worn by the patient.

Indications for Use

SmartPill is indicated for use in evaluating patients with suspected gastroparesis, a condition in which there is a delay in food emptying out of the stomach. SmartPill is FDA approved, clinically accurate and is a more comfortable alternative to standard gastric emptying tests and motility procedures.

Billing

Listed below are the specific billing code and fee associated with the SmartPill GI Monitoring System. While this procedure has been approved by the FDA, it is still considered experimental by many insurance companies and therefore may not be covered. The actual allowed amount (the amount of the billed charge deemed payable by an insurance plan) for each charge and the amount of your out-of-pocket expenses will depend on your particular insurance plan. It is important to check your individual policy and direct any questions to your insurer to determine coverage and your financial responsibility prior to receiving treatment.

If you have any further questions, please contact the Business Office at 612-871-1145.

| Billing Code (CPT Code) | Charge Amount |
